# **Name Of the Project**

A2Z-Scholarship

## **Objectives**

We want to establish a website that serves a portion of community who are interested in going abroad for higher studies, research or other kind of education purpose by –

- i. Giving a bunch of numbers of universities, colleges, and service institutions that provides opportunity for them.
- ii. Skills such as essay writting needed by various institution to be accepted.
- iii. the detailed process of getting scholarships from institutions.
- iv. community platform for helping each other by providing uni-related queries.
- v. give expert sugession about it.

## **Description**

### **Motivation**

People wants to study abroad. So we decided to built a website that helps with information about the institutions, the scholarships they provides, requirement skills, application process, passport-visa and other formalities, accomodation and other facility, and other opportunity related things. We can give sugessions based on the degrees, skillsets of a student where he/she should try.

### **The idea**

Our platform will have many functionality such as descriptive data, forums, Q/A section, blog by experts, essay correction and finally some real world examples with the good authority links. There will be feedback section and reviews from people who have got helpful information from here.

### **The website**

Our website contains sections based on the idea such as a list of colleges and universities that offers such kind of scholarship opportunities. Where the data can be sorted using basic criterias. A fourm where users can post their problems, thoughts and moderators or experts can answer them.

There will be a blog section where expert people can give advice and opportunity. And a basic Q/A section where some answers of frequently asked questions and answers are available here.

Modern universities requires some kind of special essay writting and we can give good sugession about it.

## Software

The frameworks and languages we are supposed to use –

- HTML
- CSS
- JAVASCRIPT
- PHP
- SQL
- FLUTTER , etc

## Conclusion

A goal without a plan is just a wish. One of the motive of our platfrom is to help those students mainly from undergrad level wants to advance their career in abroad. Our next plan for the website is to provide some courses and combine the experts with students more and addition of subscription and AdSense in some pages.
